DETAILED ACTION

Objections

1. Claim 3 is objected to for having a minor informality. On page 18, line 1, the claim recites, "shield *wring* films." This appears to be a typographical error and should recite "wiring." Correction is required.

Claim Rejections – 35 U.S.C. 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Higgins (US 5,639,989).

4. Regarding Claim 1, Higgins discloses a wiring board comprising:

interlayer insulating films (24, 16) (Figure 3),

multilayer wiring films (horizontal section of 18, 22, 25), each being provided at one of the interlayer insulating films or between two of the interlayer insulating films,

interlayer-connection conductor films (20B) (Appended Marked-up Figure 3) each extending through at least one of the interlayer insulating films and providing an electrical connection between at least two of the interlayer insulating films,

at least one bare semiconductor integrated circuit device (13) (right hand side) (Figure 2),

a first shield wiring film (60) (Figure 3) provided above the semiconductor integrated circuit device and a second shield wiring film (27) (Col. 7, lines 56 – 61) provided below the semiconductor integrated circuit device, and

a plurality of shield interlayer-connection conductor films (20A) (Appended Marked-up Figure 2) that are provided so as to surround the semiconductor integrated circuit device and that provide electrical connections between the first shield wiring film and the second shield wiring film (20A) (Appended Marked-up Figure 3)

each shield interlayer-connection conductor film extending through at least one of the interlayer insulating films (See Figure 3).

Allowed Subject Material

5. Claims 2 – 6 are allowed. A review of the prior art of record revels that the limitation for a wiring board comprising, “*a first shield wiring film on which the semiconductor integrated circuit device is directly mounted*,” and “*a second shield wiring film with the semiconductor integrated circuit device interposed therebetween*,” is not taught or suggested, either singularly or in combination.
